

# Lee Green

**Chief Architect, Enterprise Technology Division at Blue Cross Blue Shield of Massachusetts**

Lee Green is Chief Architect for Blue Cross Blue Shield of Massachusetts, the largest insurer in Massachusetts with approximately 2.8 million members and policyholders. Mr. Green is also an active member of the Blue Cross Blue Shield National Network of Architects and Innovation.

Prior to his move to Boston and joining Blue Cross of MA in 2016, Mr. Green led Architecture and Information Management for NASCO, an organization providing core Back Office Payer platforms and capabilities to multiple BCBS plans. Mr. Green also spent over a decade consulting for both Deloitte and PricewaterhouseCoopers (PwC) in areas of Data and Technology.

Mr. Green holds a degree in Computer Science from the Georgia Institute of Technology (1997). With a background focused on Enterprise Information Management and Enterprise Architecture, Mr. Green has a passion for the power of information, insights and their combined ability to influence consumer-centered actions and their capacity to transform the healthcare and payer industry.
